GARDEN - No burials in this portion of the burial ground

Key to Map:

Burial in solid black line - is marked by a gravestone

Burial in dotted blue line - has no gravestone

Sequential number in red - introduced for the purpose of this map in 2008 and has no historical significance. It is NOT in date order.

Name in Blue - person known to pre-date the start of the 1904 burial register
It is possible that some of the unmarked graves 2, 18 & 19 also pre-date 1904

Name in Orange - person not recorded in burial register, may represent a memorial without burial e.g. cremation at 50 & 62
However, the burial register does not appear to have been maintained in the years 1952-1957, which may account for 16, 27 and 61

Sources of Information:

A graveyard plan in ink which appears to have been produced circa 1947
The names for unmarked graves 2, 17, 18 and 19 are taken from this plan.
The names for other unmarked graves have been added by pencil at a later date

The gravestones themselves.

Anomalies:

20 - Martha Bennion is incorrectly recorded as 1932 in the burial book
53 - William Henry Edge is incorrectly recorded as 1932 in burial book

61 - Is recorded in the 1947 plan as the child graves for the Lewis family, but is not on the gravestone.
It is possible that the late dates on 27, 42, 47 and 49 are because these have also been re-used.
This may account for some of the burial places for unknown graves in the register.

Although the ground to the south of graves 45 and 55 gives the impression of disturbance there is no evidence from the burial register to suggest missing graves here, in the relevant time period.

63 - Mary Jones could not have been buried here in 1881, pre-dating the burial ground.
